Detail, [please!](#)

### ZODIAC PROPER

Things will never be the same as we finally have *zodiac proper* here - the Academic Zodiac. Do we hear “*Can you fly this thing<sup>i</sup>?*” Of course we can, we designed it.

### ACADEMIC ZODIAC

The Academic Zodiac has been tested on spacecraft - it'll encompass your own case. From Himalayan altitude down to any depression; 7000 miles under the sea: the universal Cartesian house system renders seamless results in cases of seaquake as measured exactly at epicenter. Yes, 9-11 as well. 9-11 happened with Eris @ 0 azimuth W as setting in Cetus + Osama Moon @  $\chi_1$  Orionis. Don't let it happen to you – not ever again.

# Lo zodiaco nazionale italiano

Lo zodiaco sfoggia ben *dieci* costellazioni zodiacali “nascoste” all’insaputa anche di molti italiani dove quello scientifico è già italiano da anni.

<http://www.lulu.com/spotlight/astrology> <http://ow.ly/7GIYe>

Lo zodiaco già italiano? Di nazionalità italiana, lo zodiaco sfoggia ben ventidue (22) costellazioni, non necessariamente “abbinata” ai sedici (16) ascendenti.

Come l'Ordine dei Templari di Hugo Pagani, l'astrologia è di nazionalità strettamente italiana.

L'Italia firma lo zodiaco scientifico. Lo zodiaco accademico fa parte del patrimonio culturale italiano. Nato nei anni settanta, sfoggia una Luna massonica in Sestante, nonché Plutone in Coma Berenices.

Capelli corvini un po' stregati: uno degli attributi della luna in Corvo. Tra i molti significati di questa posizione zodiacale, donne corvine come esseri speciali già magici che emergono nella sfera del mago al tempo segnato dalla luna in corvo. Da notare che dopo il Corvo o Corvus, la luna entra nella costellazione del gufo, Noctua.

Cetus is one of the 22 zodiacal constellations and also one of the 16 eastern ascendants for the current epoch. It is the sign of our times. Whales, narwhals and dolphins are our astral teachers besides representing holy totems of our epoch. Cetus marks the sign of [Jonas](#). While most planets waded through Cetus in the year 2011, year 2012 marks the apex of the present eon of Cetus with Sun and Uranus congressing in Cetus for the spring equinox 2012. 6-6-2012 children are next! ||::||

Welcome to the year of the ||::|| dolphin, 2012. As through the years 2011 and 2012 most planets transit Cetus, [children](#) born at this time were nicknamed “[dolphin kids](#)”. One can even have all natal planets *plus ascendant* in Cetus, thus exemplifying the sign of our times. Eris<sup>1</sup> is “resident” in Cetus for this generation.

**Psa 91:11** For he shall give his angels charge concerning thee, to keep thee in all thy ways. Your guardian angel is the eastern ascending star. There are sixteen (16) ascending constellations at east for the current epoch. Which one is your own guardian angel? <http://ow.ly/6TpWd> Conosci il tuo unico angelo custode? The Sun figures as one of the most acclaimed<sup>iii</sup> objects<sup>iv</sup> in popular astrology<sup>v</sup>. Do you know its veritable zodiacal position? As free horoscopes are mostly intended for entertainment only, they never reproduce any original natal sky at all<sup>vi</sup>. Thus, Sai Baba was born with Sun in Libra on November 23<sup>rd</sup>. How about you? <http://ow.ly/6Tq9A> The generally known 13 Sun-signs expanded are in fact 15, even 16. Is your natal Sun in Orion or Cetus?

The lunar zodiac represents a complex grid. Leave the calculations to us as your natal Moon sign gets properly determined. Alixe<sup>vii</sup> has Moon rising in Cetus, Mercury in Sextans along with Venus in Orion. Her Juno is in zodiacal Scutum while Pluto sits on the ascendant of the USA in Serpens Cauda. Is your child a genius as well? <http://ow.ly/6Tqb1> Your natal Moon can be anywhere from Auriga, Corvus or Sextans. Who knows? We do.

<sup>ii</sup> Disclaimer: we don't sell software, yet. A note as follows. Even if you *would* have appropriate software, what would you do with it without initiation proper? Get VIP Services in order to get to know some basic things about yourself first, such as ascendant or the position of the natal Sun. VIP catalogs abound even after the October 2011 whitewash: 10% of 13000 still makes 1300. Astrology is too complicated but RTRRT are simple, so focus at changing any bad eventuality as associated with any futurity of yours.

<sup>iii</sup> Although inessential in most calculations- see *Sunless Astrology*. Non-determining for most purposes, the Sun is a malefic like any other – it can be said to encompass all negative ego energy. On the other hand, in most traditions it is the Moon that determines one's original attitude, thus leading to true self. Shiva stands for lunar directions, of which some 500 are perused in popular astrology.

<sup>iv</sup> Server clean-up issues as scheduled for October 2011 leave only 1000 essential publications online out of 12000. For example, a terabyte of old Eris material dated as early as Aug 1st 2005 has been completely removed on account of old age. While Eris is still relevant as secondary marker of our era, its research materials were deemed as slightly outdated against current standards. That leaves the material mostly static, since e.g. as of October 14<sup>th</sup> 2011, no animated X-zodiac is readily available for the outer lodge any longer.

<sup>v</sup> It is generally assumed that there are 13 Sun-signs. While that is a correct assertion, the number of Sun-signs expands to 15, even 16. As concern the Moon, the matter is infinitely vaster as well as complex. Your natal Moon can be anywhere from Auriga, Corvus or Sextans. Who knows? We do.

- 1) <sup>vi</sup> Astrology is not at all some sort of game or "for entertainment only" business at all; it is a matter of national security.
- 2) The ascendant of the USA is Serpens. Alternatives are Aquila and Ophiuchus.
- 3) 9-11 happened due to Eris 0 azimuth W in Cetus + Osama Moon  $\chi_1$  Orionis.

KNOW YOUR OWN ||:|| DOLPHIN

Let's face it: people would **kill**, as countries already do, in order to know who they really are, but there's no one to tell them so because nobody knows. Countries already do: countries **kill** in order not to know who they really are. All national heraldries messed up, that entire ocean of dolphin blood at their own hands. Whale slaughter happens due to not knowing a simple thing: the Sun is not at all fixed at some fictitious zero Aries for spring equinox: we are living in the era of Cetus, the whale: the totemic animal spirit of our times. Not to lie is not to kill, that simple. Start with a simple Sun ephemeris and work out towards your own freedom. It is more efficacious to be oneself than someone else for a lifetime.

---

## LAST COKE

If people would kill to get to know who they really are, why do you never meet one? There are other people who kill millions by not telling them who they really are. They tell them who they are not. The trick is to associate oneself with e.g. some popular father figure such as Santa Claus in order to poison the nation with junk food or faux data: anything goes as legal but you are still not yourself at all. You are an experienced life coach and you still are not yourself. You know everything about Capricorn but you don't know that you can not have it ascending at all. Next thing you die not knowing what was before your own eyes all of the time. Such is the power of persuasion by faux authority.

## CETUS

During the years 2011 – 2012, seven planets join Eris within one of the largest zodiacal ascendants for the present epoch *and sign of the Aeon*: Cetus.

### AGE OF PEGASUS

China and Egypt always shared a promising zodiacal base to build upon. In return, the Academic Zodiac hosts all Chinese and Egyptian zodiacal models and systems with pleasure and privilege of an all-encompassing omniversal system. As Venus rising at east in Pegasus announces the Gaussian peak of said Age, heavens are shaken by Dantesque conflicts between cetacean dæmons and Luciferian vimana.

- a) If you are happy with just any natal Sun-sign, don't bother.
- b) If you like to adapt to whatever personality they impose on you, go ahead.
- c) If you already got twin natal Sun-signs, don't bother either, get a third one perhaps.
- d) But if you are genuinely interested in your natal horoscope, know that there is one!

#### ACADEMIC ZODIAC

Once upon the time when astrology diverged from astronomy<sup>vi</sup>, people worshiped faux natal skies. Both East and West, confusion reigned as babies would be born into false personalities. No “astrologer” knew one’s own baby’s Sun-sign! Jehovah strongly admonished but apparently no one listened. Those who warned were ignored and silenced. Superstition flourished. People never knew who they are and whence their problems really came from. The Devil fed on malice that emanated from issuing confusion and emotional turmoil. Countries had misplaced heraldry, Masonic temples were disoriented, symbols were confused and occultism disgraced. People knew no Tarot proper. They never knew that they have one true natal sky only as sidereal is tropical. Then Hayagrivananta inspected the zodiac and established it in minutes. Once false separation between astrology and astronomy was put to an end by the Academic Zodiac, humanity entered a golden era of peace and prosperity as divorce, having a wrong organ cut off or bankruptcy became things of the past. Once more the whale rules the planet and e have peace. From time to time the mind of man takes a sudden leap forward in inventing something which makes life so much easier that people soon begin to wonder how they ever got on without it. The wheel, printing, electricity, Internet; and now the Academic Zodiac<sup>vi</sup>. <http://ow.ly/7cPnW>

#### NONE OF THE TWO

You used to have two horoscopes = for your twin = identities. You learned to love this positive schizophrenia, only none of the two was ever your own natal horoscope at all. What if your own horoscope were produced by your real natal skies? How would it look like? Tao is neither yin nor yang: Tao knows none of the two – just like in your own case.

#### A WINNING CONCEPT

The Academic Zodiac is the latest *and first* in any astrology, the Astrology. Astrology on planet Earth can not exist without the zodiac and *man never had it*. God & NASA: Jehovah gave strict astronomic directions which summed up in the Academic Zodiac. As the world is not enough, the universal house system was tested on satellites in and out the solar system with seamless results. Note that previous kindergarten models would shamelessly crash just south of Oslo. Tekton in Hydra ascending at an underwater epicenter? No problem! This one works under the sea, on mount Himalaya and absolutely everywhere and *at any speed* in and out this solar system. The local zodiac scans itself! The animated Academic Zodiac is not only about planet Earth but also our near futurity as colons on Cruithne and throughout omniverse in general, according to its winning planetocentric concept and local zodiacal praxis.

---

The guardian angels presenting as eastern ascendants of the Tarot account for the sixteen elementary permutations generally known as “court suite” within the I Ching Aspectarian.
